

Project Initialization and Planning Phase

Date	03 October 2026
Team ID	Not provided
Project Name	Food Ordering Behaviour and Consumer Trends
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics - who are they?	Describe the customer and their attributes here
I'm trying to	List their outcome or "job" they care about - what are they trying to achieve?	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way - what bothers them most?	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problem or barrier exists - what needs to be solved?	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view - how does it impact them emotionally?	Describe the emotions the result from experiencing the problems or barriers

Example:

I am a traveler	I'm trying to book flights on my phone	but it takes a long time	Because the website is not responsive and doesn't have a mobile version	which makes me feel Frustrated
---------------------------	--	------------------------------------	---	--

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	a food ordering customer	choose suitable food and restaurants based on	it is difficult to understand	the dataset contains many orders	it is difficult to identify clear ordering patterns from individual records

		preferences , cuisine and meal type	which cuisine s, meal types and restaur ant categor ies are commo nly selecte d	with different customer, restaurant , city and meal characteri stics	
PS-2	a restaurant or food- service business	understand customer ordering behaviour and identify demand patterns	individ ual order records do not directly show clear pattern s across cities, cuisine s, compa ny types, age groups and meal types	customer behaviour varies across several categories in the dataset	a visual analysis is needed to compare the major ordering patterns
